

Joint Resolution 1: Tying defense spending to GDP is problematic at best. When GDP goes down, then defense spending goes down. When GDP goes up and defense requirements remain the same, we find ourselves throwing money into DOD that it doesn't need. This resolution has been in place for at least four years. Some state needs to pass a resolution in its state conference to have it deleted from the packet so it can be considered at NGAUS. Recommend NGAKY submits a resolution to delete Joint Resolution 1.

Joint Resolution 4: Delete bullet F (remove limits on AGR control grades) and I (keeping techs to age 60), as this could tie up even more senior positions with full-timers and hinder the career of M-Day Soldiers. They are both, in the long run, not good for the National Guard. Recommend we pass a resolution to delete both Bullet F and Bullet I.
